

Valuement added value on Data Quality

Data • Suppliers data transformation Master Data Data processing • Terabytes of data processed yearly Cleanse processing Own data infrastructure services Value • Over 100 analysts in 10 countries Vendor • Multi-language and currency capabilities Master Data Data Audit & • More than 5 billions rows analyzed each year Enrichment analytics • Large library of gueries and algorithms Compliance Added • Advanced knowledge in P2P process Best • Experience in supplier relationship Dashboard & Knowledge practices & • Insights for process optimization KPIs Benchmark • Proprietary tools and reference databases • Experienced team in data driven activities Results-• ROI business cases Customized Services oriented Value-led fee models services services Customized services

Valuement Approach

Management of master data might seems to be a data handling only task. However, ensuring the integrity and completeness of supplier master data depends on understanding the business process and retailers specificities.

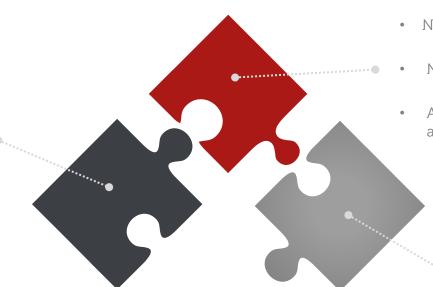

Current state assesment & evaluation 2. Define new process & responsabilities 3. Recommandations & Planification **VENDOR MASTER MANAGEMENT** STEP1 Data acquisition & rules definition STEP 2 Cleanse data **VENDOR MASTER CLEANSING** Delete duplicates vendors STEP 3 VENDOR MASTER ENRICHMENT State of data to qualify Requests to suppliers & follow-up Data entry
